

Manual Uninstall of WinSuite AD/EE from 9x/ME client

To manually remove WinSuite AD/EE from a 9x/Me CLIENT computer (*not* a SERVER, or NT/2K/XP computers), do the following:

1. Logon to the WinSuite AD/EE Client computer as a member of the Domain Admins Global Group (or see Caveat 2 above)
2. Click Start | Run and type Regedit.exe, click OK (see Note: below)
3. Navigate (in the left pane) to HKEY_LOCAL_MACHINE\System\CurrentControlSet\Services\MSNP32\NetworkProvider
4. There will be an entry on the right pane for ProviderPath
5. Double click the ProviderPath entry
6. Change the value FROM adnp32.dll TO msnp32.dll
7. Close Regedit.exe
8. Restart the computer
9. The native Windows logon should now appear
10. Logon as a member of the Domain Admins Global Group
11. Open Windows Explorer
12. Go to C:\Program Files\WinSuiteAD
13. Select (highlight) the C:\Program Files\WinSuiteAD folder (*not* the C:\Program Files folder!)
14. Press the Delete key on the keyboard
15. Empty the Recycle Bin
16. Click Start | Run and type Regedit.exe, click OK
17. Navigate (in the left pane) to HKEY_LOCAL_MACHINE\SOFTWARE\NDITech
18. Select (highlight) the NDITech key
19. Press the Delete key on the keyboard
20. Close Regedit.exe

WinSuite AD/EE Client software is now *mostly* removed from that 9x/Me computer.

Note: In those situation where you cannot edit the registry (for 9x/Me computers *ONLY*), but you can get to an MS-DOS Prompt, simply type:

```
copy c:\windows\system\adnp32.dll adnp32.old  
copy c:\windows\system\msnp32.dll adnp32.dll
```

and restart the 9x/Me computer.
