

# NDI Technologies®

## Making Technology Work for Criminal Justice

### Number one for all things PNC... **and more**

NDI Technologies is the leading company for all things related to the Police National Computer (PNC). This includes desktop and mobile access, user training, consultancy and integrating PNC access into other applications. We have been providing access to PNC for *more than 25 years* and specialise in helping police forces to get the best from PNC as quickly as possible.

Because access to PNC is now required for many staff outside of the traditional PNC Bureau, NDI offers easy-to-use PNC GUI interfaces with access filtered to meet the business task of the user... thus reducing the training overhead.

### Bespoke Developments

NDI's highly-skilled development team could produce an integrated system especially for your requirements. We can even help you write the specification.

### Not Just PNC!

In addition to PNC solutions, NDI can provide integrated access to multiple disparate applications on a wide variety of hosts.

NDI is able to connect to, search, extract, present and update data residing on almost any host system in use today.

**Supported host platforms include BULL, IBM, ICL, MDIS, Sun, Tandem, Unisys and UNIX.**

**Database platforms supported include Ingres, Oracle, SAP, SQL and any other ODBC compliant database.**

### PNC Training including **CBT**

Our PNC user training department offers not only highly-skilled face-to-face training, but also Computer-Based Training (CBT) to help alleviate abstraction issues. The training department is accredited by and is a member of the Institute of IT Trainers (IITT) and trains to the National Police Standard. To help overcome the practical difficulties of training large numbers of officers, Computer-Based Training modules are available.

### Mobile Data

NDI is the leading provider of mobile data and associated consultancy to the police. To meet the demands of modern, efficient, front-line policing, NDI has developed UniForm®, a software framework containing a suite of mobile data applications with full management reporting.

UniForm enables officers to receive and capture information appropriate to the business task in a secure environment.

Beyond "Forms": Unlike standalone forms-based solutions, UniForm can automatically integrate PNC, QAS (Voters) and Local Intelligence information into your business process where appropriate. In addition, NDI can provide mobile data solutions tailored to your individual needs.

## PNC ePrint and PNC eBroadcast

### Simplifying police work

- › PNC ePrint distribution saves time and money printing and distributing PNC information to others.
- › PNC eBroadcast distribution is the effective way to distribute broadcast messages throughout your force.

## PNC Guard

### 24/7 Real-Time PNC Auditing

- › The easy way to track all activity on PNC.
- › Overt & covert modes.
- › Targets suspected misusers.

## PNC SRG

- › No more running out of PNC sessions. The SRG allows up to 40,000 connections, making it ideal for expansion of PNC facilities into your force.
- › Expand your PNC usage to more desktop users, to more mobile users, and integrate with more of your applications.

## Training

### NDI has professional and flexible options to meet your demanding PNC training needs

- › Fully qualified and experienced trainers.
- › NPIA approved e-Learning CBT's - the fastest most efficient way of training PNC.
- › IITT Gold Standard Accredited Training Provider

## UniForm

### Encounter-based, Mobile Data Framework with fully integrated management and auditing reports

- › Pre-populates search results data directly into forms (e.g. PNC data into a StopSearch form).
- › Multiple searches can be performed against different databases simultaneously from a single screen (e.g. PNC, Local Intelligence and QAS Voters).
- › Forms can be created, edited and printed on or off-line.
- › Smart Client software can be easily deployed, managed and upgraded Over-The-Air.
- › UniForm Framework allows rapid development and deployment of standard or tailor made forms, enabling easy integration into your current or future business processes.

## PNC Xpress® Family

### As the leader in PNC provision to UK police forces, NDI is at the forefront of providing simplified enquiries for occasional PNC users.

- › The PNC Xpress family is an easy-to-use series of interfaces for Desktop, Handheld (BlackBerry/Windows Mobile PDA) and In-Car Mobile Data Terminal (MDTs) environments. PNC Xpress enquiries include NE, VE, VK, DL, VM, VC and PE.
- › With NDI's unique "Composite Enquiry" an officer can quickly carry out a single combined NE, VE (or VK), DL and QA.
- › With our newly developed matching PNC Xpress CBT packages, your organisation will gain flexibility and control over how, where and when an officer will be trained on PNC.
