

# XML Integration Toolkit®

## Delivering the Next Generation of Joined Up Criminal Justice Solutions

### Flexible, **Service-Oriented** PNC Integration

NDI's XML Integration Toolkit enables e-policing both to and from all force systems where any Officer, from anywhere, at any time, will be able to access consolidated operational data gathered from any force systems as a single enquiry. The information returned to the user can be delivered to a PC, Laptop, PDA or most other handheld devices.

NDI provides a choice of technologies in order to dovetail with your chosen strategic development architecture. These include:

- › PNC XML Interface
- › PNC .NET Web Service
- › Web Services for other in-Force applications

### Key Benefits:

- ✓ It allows a developer to integrate PNC into an application with less knowledge of PNC than would otherwise be necessary.
- ✓ Transfers the burden of maintenance in the event of changes to PNC to NDI.
- ✓ Includes Web Service and direct XML exerciser applications.
- ✓ Includes rudimentary off-line PNC emulator.
- ✓ Comprehensive documentation.

Add PNC **query and update** functionality to police line of business applications.

NDI has recently completed projects for many customers in the following areas:

- › Custody Suite integration
- › Electronic Phoenix record
- › Warrants Update
- › Mobile PNC/Crime Recording/Domestic Crime/Intelligence
- › Intranet front-end to all in-force databases
- › Web Service creation for legacy applications
- › XML integration
- › .NET applications
- › DNA back-record conversion
- › Schengen/Sirene

NDI ConsoliData also allows browser based access to any local Force or agency application. NDI Technologies has been providing access to PNC for *more than 25 years* and specialise in helping police forces to get the best from PNC as quickly as possible.

We at NDI specialise in “applications integration” and the delivery of PNC data. In addition, NDI also enables the integration of other core Criminal Justice applications. We believe these to be key factors in the company’s success.

## Currently supported legacy host platforms include:

- › BULL
- › IBM
- › ICL
- › MDIS
- › Sun
- › Tandem
- › Unisys
- › Unix
- › PNC (of course!)

NDI is able to connect to, search, extract, present and update data residing on **almost any host system** in use today.

## Database platforms currently supported include:

- › Ingres
- › Oracle
- › SAP
- › SQL
- › any other ODBC compliant database

Third party vendors prefer ConsoliData when integrating host application data within their own applications. As well as in-house development teams we also work with all the major vendors in the Criminal Justice environment. Alternatively, we are always happy to work with your development partner of choice.
